My student has access to computer, internet, and required software such as Adobe, Java, etc.

Credit Recovery and Enrichment Course (grades 6-12)

Course: _____

Course: _____

Course: _____

What would you like your student to accomplish with our Summer Program:

The Hardin County ESC Summer Program offers tutorial as well as credit recovery and enrichment programming at parent expense. If this programming is to be recognized for any type of course credit, it also will require approval of your child's building principal before we will implement summer instruction.

Our program fee structure is based on what our parents wish to have. Minimal fee is \$35 for the Compass Learning web-based software. The addition of teacher support (tutoring) will increase costs; however, this will vary as parents will also decide on the amount of support time (i.e. weekly, biweekly, etc.)

Courses are available for credit from either Lincoln Interactive or Learning Springs. Course credits can cost as much as \$225 per course. Again, to receive credit for successful completion, your building Principal must approve this course prior to registration.

Our goal is to be your one-stop shop for educational support services, helping your child find a successful school experience and enjoy learning.
